MODUS X joins CyberTech committee of IT Ukraine Association

MODUS X has joined the CyberTech Committee of the IT Ukraine Association — a professional platform that brings together leading companies to jointly develop a culture of cybersecurity and strengthen Ukraine’s cyber resilience. Yuriy Shatylo, Head of Cybersecurity, will represent MODUS X in the Committee.

“Being part of the CyberTech Committee is an opportunity not only to share expertise, but also to shape a high-quality environment for the development of cybersecurity in our country. For MODUS X, this is a logical extension of our strategy — to build secure digital solutions for critical infrastructure and business,” comments Yuriy Shatylo.

The CyberTech Committee is one of the key areas of activity within the IT Ukraine Association, — the largest community of IT companies in Ukraine, representing the interests of over 100,000 professionals and uniting business, government, and international partners to support the growth of the IT industry and promote Ukraine as a leading technology nation.

MODUS X continues to actively reinforce its internal cyber security system, implement cutting-edge approaches to IT infrastructure security, and develop partnerships with key industry stakeholders. The CyberTech Committee membership opens up new opportunities for cooperation, joint influence on policymaking, and Ukraine's integration into the global cyber community.

About MODUS X

MODUS X is a Ukrainian tech company that is part of DTEK Group and provides professional IT services and solutions for large and medium-sized businesses both in Ukraine and abroad.

The company employs over 700 experts, drives digital transformation, implements innovative technologies to improve business efficiency, and develops its own products.

Core technological priorities of MODUS X are data management and artificial intelligence, development and implementation of business applications, IT infrastructure, cybersecurity, arrangement of modern workspaces and providing technical support, and IT consulting.

The company is a partner of leading global IT providers, including Microsoft, SAP, Creatio, IBM, Lenovo, Trend Micro, Check Point, Veritas, Tenable, and others.
