DTEK Renewables To Develop SPP Design for Hlobyne City Council

DTEK Renewables is developing the design documentation for the construction of a 2 MW SPP for the Hlobyne City Council (Poltava region). Such assistance is an important element of support for the community in the context of the need to develop distributed generation.

The City Council plans to build the plant on its own and with grant funding.

*‘We will consistently fulfil our commitments to the community as set out in the memorandum of cooperation for the construction of Poltavska Wind Farm. - said **Oleh Solovej, Deputy CEO of DTEK Renewables.** - ‘Our team of professionals will develop the SPP design and undergo a technical expert review, which will help the community to improve energy security and save money for other infrastructure and social tasks.’*

The company's specialists plan to complete the design of the SPP and pass the construction expertise in September.

The company will hand over all the necessary documentation for the construction of the SPP to the Hlobyne City Council for further project implementation.
