## **FUIB wins several nominations of Power Banking. First-Half 2023 rating**

**First Ukrainian International Bank (FUIB) has been recognised as the leader in several nominations of Power Banking. First-Half 2023 rating compiled by the Association of Ukrainian Banks.**

The rating is based on the NBU public data of banks' performance in H1 2023.

FUIB received honorary awards as a bank with private capital for providing support to business (for the number of loans granted to legal entities) and for being a reliable partner of Ukrainians (for the number of loans provided to individuals).

Experts report that, despite the war, the national banking system has shown an impressive resilience, withstood the challenges posed by the crisis and remains stable and reliable today.

FUIB is immensely proud of this recognition and is confident in the victory, so it continues to work 24/7 for the benefit of every Ukrainian!
