## **Metinvest buys UAH 6 million worth of vehicles and equipment for Khartia fighters**

**As part of Rinat Akhmetov's Steel Front military initiative, Metinvest has acquired six vehicles, ten drones equipped with thermal imagers and two Ecoflow charging stations for the Khartia 13th Special Forces Brigade of the National Guard. The shipment will be delivered to the frontlines very soon.**

The forthcoming victory depends on many crucial factors. One of them is the consistency and relevance of the provided assistance. Metinvest is committed to supporting the country's defenders by providing modern machines and equipment to the battle lines. The major focus is on essential resources: vehicles and drones.

Another shipment of supplies, valued at nearly UAH 6 million, has been delivered to the Khartia 13th Special Forces Brigade of the National Guard. The assistance package comprises five pickup trucks, ten drones equipped with thermal imagers, and two Ecoflow charging stations.

Metinvest Group has been actively sending its own vehicles to the frontlines since the outset of the all-out war, and has also been sourcing and importing vehicles

from abroad. The new shipments include all-terrain vehicles designed to transport personnel, evacuate injured soldiers and deliver ammunition supplies.
