Ukrtelecom sends 170 UAVs to Ukrainian defenders

Ukrtelecom has handed over to the army a batch of special-purpose drones on behalf of [Rinat Akhmetov's Steel Front](#) military initiative. These drones manufactured by reliable Ukrainian companies, have been sent to various units of the Ukrainian Defence Forces, providing invaluable assistance in the most challenging sectors of the front line.

"Right now, we are all doing everything we can to secure the victory. This shows that our country stands united. It is crucial and important that Ukrainian companies support our warriors. We are grateful to Ukrtelecom and Rinat Akhmetov's Steel Front for their help," comments a representative of the Ukrainian Defence Forces.

"Ukrtelecom has been steadfast in its support of our Ukrainian fighters.

"Since the beginning of the full-scale war, Ukrtelecom has channelled UAH 65 million in aid to the Ukrainian defenders, which includes UAVs, medicines, combat management systems, corporate vehicles, and much

more. Today we proudly and with great respect deliver a batch of special-purpose UAVs to the Defence Forces. It is very important that Ukrainian businesses help the Armed Forces of Ukraine, as together we are bringing our victory closer. Thanks to our heroes we can live and work in our homeland. Our defenders courageously and steadily liberate Ukraine's territories from the aggressor. We are proud of the Ukrainian defenders and will continue to help. Glory to Ukraine! Glory to Heroes!"

commented Ukrtelecom CEO Yuriy Kurmaz.

Over 350 Ukrtelecom employees have joined the ranks of the Armed Forces of Ukraine.
