Metinvest hands over UAH 10 million worth of optical devices and equipment to the National Guard of Ukraine

Deadly battles keep on along the entire front line. Metinvest has donated a large batch of optical devices and equipment worth UAH 10 million to improve the efficiency and effectiveness of offensive operations and save the lives of Ukrainian defenders.

The Rinat Akhmetov's Steel Front military initiative helped the newly established unit of the Offensive Guard of the National Guard of Ukraine and provided the combatants with 20 night vision devices, 7 range finders, 30 collimator holographic weapon sights and magnifiers, 10 Schteiner binoculars, 7 DJI MAVIC 3T and FMC quadrotors, tablets and a laptop. Also, Steel Front handed over a bus and a pick-up truck to improve the mobility of soldiers.

FIGURES

The UAH 10 million worth optical devices and equipment are top-notch. Our

combatants say the equipment will help them perform special combat missions more efficiently and save more lives.
